2024

The latest addition to the range of SL Boats! A particularly high-quality and competitive houseboat of Dutch manufacture.

SL Houseboat Kerkdriel Inclusief Ligplaats

Houseboat Kerkdriel, a custom-build houseboat adapted to your wishes! Together with our advisors and in consultation with the builder, we will look for the design, layout and dimensions that suit you. You are at the helm when building your ideal waterhome!

The Houseboats built by SL Boats are manufactured entirely in the Netherlands and surpass the competition when it comes to high quality and durability.

The base consists of two compartmentalized stainless steel floats which are connected by a stainless steel intermediate box which forms one solid unit. The machine-shaped stainless steel compartments are connected by a welding robot and then pressure tested and inspected per segment.

The construction consists of a very solid Light Steel Frame with high-quality insulation and plastic frames equipped with HR++ glazing. As for the motorization, you can choose from an electric drive or a fuel variant, the preparation for a bow thruster is standard and navigation lights are also fitted as standard.

Outside, the ship is finished with a black bumper, aluminum railing, 4 stainless steel bollards and full-core plastic decking. This houseboat comes standard with kitchen and bathroom, but a fully furnished version is also possible. In short, a Dutch quality product for a competitive price!

Are you interested in another layout, do you have specific wishes regarding interior or exterior styling or do you prefer a larger or smaller version? Do not hesitate to contact us, we will gladly discuss with you the possibilities and take you through the construction process.

Price example concerns houseboat shown in dimensions 12.00 x 4.50 mtr. and specifications/equipment as described. Excluding motorization/boating package & furnishing.
