Berth**Year**

2023

High quality built houseboat. Stainless steel floats, aluminum frames, heat pump air conditioning for heating and cooling.

SL Houseboat Zonslag Inclusief Ligplaats te Kerkdriel

This demo boat 'Zonslag' is the youngest member of the SL Boats family and is a beautiful example of pure Dutch quality construction. **Now reduced in price and including mooring in Kerkdriel.** This high-quality built houseboat recently rolled out of the shed, ready for her future owner who can choose between a combustion engine or fully electric sailing for the motorization. The basis has been chosen for two compartmentalized stainless steel floats that are connected to each other by a stainless steel intermediate container that form one solid whole. The stainless steel compartments are formed by machine, connected to each other by a welding robot and checked and pressurized per segment.

The large aluminum window frames flood the interior with light and through the sliding doors in both the living room and the bedroom there is contact with the water at any time. The kitchen is equipped with a 2-burner induction hob, combi oven/microwave, extractor hood and refrigerator. In the bathroom you will find a spacious shower cabin, electric toilet and an electric design radiator for the towels. There is plenty of hot water available and is supplied by an efficient 80 liter boiler and the indoor climate can also be excellently controlled by a heat pump air conditioner that can both heat and cool.

In consultation, a 'maritime package' can be chosen, with which you can add solar panels, (electric) engine(s), a steering system, a bow thruster and a balustrade on the outside.

If this model appeals to you or if you have specific wishes, please contact us without any obligation.

Moorings available at various locations in the Netherlands, only in combination with the purchase of an SL Houseboat
