## **Valkkruiser 14.00 VS**

Since its construction, many upgrades have been carried out over the years and the ship can now rightly be called a complete ship. Partly due to the fixed wheelhouse, she can be used all year round and things like a generator, inverter, washing machine and a Webasto hot air heating from 2010 certainly contribute to the comfort. In 2015, the entire ship was professionally painted (2K) and 'Flexiteak' was also laid on the gangways. In 2020, a new hood was installed that can close off the entire aft deck, in 2023 the on-board batteries and the refrigerator were replaced and in November 2024 the anodes + the antifouling were renewed. The paintwork of the ship needs local attention.
